IN THE CLAIMS

Please cancel claims 28-33.

--END OF AMENDMENT--

3. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 11, 17, 25, and 34 recite methods (claims 1 and 34), systems/apparatuses (claims 11 and 17), and a medium (claim 25), wherein threads in uniprocessor coded workloads (i.e., threads designed to execute in a system comprising a single processor) are reconfigured through specialized compilation and scheduling for concurrent execution on a multiprocessor system involving organizing the UP-coded threads into different concurrency groups. While the execution exclusion sets of Gillespie are analogous to the concurrency groups of applicant's claimed invention (they define threads that must not be executed in parallel on the multiprocessor system), Gillespie is concerned with optimizing an operating system scheduling kernel in a multiprocessor system (to minimize cache thrashing and provide fair-share time allocation) rather than converting UP-coded workloads into a multiprocessor program. The prior art of record fails to expressly disclose or render obvious the specific UP-to-MP thread concurrency group scheduling scheme (where each thread in a particular concurrency group cannot execute concurrently but can execute concurrently with any thread in a different concurrency group) of independent claims 1, 11, 17, 25, and 34.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
